Education

Thakur College of Commerce and Science **June 2023**
Master's in Information Technology (CGPA-9.2) *Mumbai, India*

Experience

Technical Associate - Galaxy Office Automation Mumbai(IN) **Apr 2023 - Present**
- I have successfully delivered impactful **FlutterFlow** projects, leveraging database implementations with **Firebase, Supabase, and Xano.** My expertise also includes building custom actions and functions using **Dart**, and integrating **APIs** to ensure high-quality, performant solutions.
- I have independently managed **Bubble** projects, utilizing its no-code platform for internal database management and seamless API integrations via the Bubble API connector.
- I have managed **OutSystems** projects by leveraging server and client actions, along with aggregate functions, to build seamless and efficient solutions. .

Software Developer Intern - 21n78e Creative Labs Mumbai(IN) (Link) **Sept 2021 - June 2022**
- Utilized **Angular10** for the development and Re-Wamp of Companies website 21n78e Creative Labs using **Bootstrap,Routing,RapidAPI conenctions** , successfully hosted.
- Utilized **Wordpress** for the development of an organic food reading system using **Wordpress Elementor** , successfully hosted and connected with **Whats App Bot** for smooth conversations.
- Optimized the **Wordpress Elementor Pro** version and created an B-Learning Website for Capabuild Tech, **increased the website traffic by 25%**.
- **Praised by the Manger** and also from the **Management Team** for innovation and impact on the project's efficiency.

Projects

Galaxy247 - Task Management System | *Flutterflow, DART, Supabase*
- **Description:** Developed a task management system enabling users to create and assign tasks to themselves or others, with options for daily, weekly, or monthly recurrence. Tasks include end dates, due dates, and automated email notifications for creation and approaching deadlines. .
- **Impact:** Streamlines task organization and tracking, reducing repetitive task creation and ensuring timely reminders, improving productivity and accountability.
- **Scalability:** Designed to accommodate increasing users and tasks, with flexible scheduling and automated features suitable for personal and team use across diverse workflows.

E-ticket - Raising ticket for problems | *Bubble, API connector, MsSql.*
- **Description:** Implemented a ticketing system where user queries sent via email (e.g., issues like "Outlook not working") are automatically stored in an MSSQL database. The data is retrieved in a Bubble app via API, where engineers manage tickets by updating statuses and estimated resolution times. The system sends automated email updates to users, notifying them when their tickets are picked up and resolved, with real-time updates reflected in both the app and the database.
- **Impact:** Enhances query management efficiency by automating ticket intake, tracking, and resolution communication, ensuring timely updates and improving user satisfaction.
- **Scalability:** Built to support growing volumes of queries, seamless integration between the database and app, and efficient handling of updates for large teams and customer bases. .

Chatbot | *Fluterflow, DART, GeminiAPI,*
- **Description:** Developed a chatbot using **Gemini API**, capable of handling smooth question-and-answer interactions. The chatbot includes advanced features such as image upload support and custom functionalities implemented using **Dart**.
- **Impact:**Delivers an intuitive and dynamic user experience, enabling seamless communication and enhanced interaction through image-based queries and tailored functionalities
- **Scalability:**Designed to adapt to increasing user demands, with extensible capabilities for additional features and integrations, ensuring robust performance in diverse applications. .

Technical Skills

Programming Languages: Angular, React, JavaScript
LowCode Technologies: Flutterflow, Outsystems, XANO, Bubble
Frameworks and Tools: Bootstrap, Tailwind,, FireBase,Supabase
Development Tools: Sublime, Browser Stack, Github,OpenProject
